

BIDDING TIPS:

Bidding is simple - there are set increments on each asset and you place your bid either manually or through Auto Bid. If you are bidding on multiple assets at once we recommend you use the **BID BASKET**.

BID BASKET:

If you are **bidding on multiple items** please add the item to your **Bid Basket** by clicking on  in the asset detail. This way you can select assets that you are interested in and then view them in one convenient location.

When bidding on multiple assets you can place a quickbid  from the MyBasket page without having to view the asset every time. Alternatively, you can place an AutoBid which will automatically bid up to your maximum.

AUTO BID:

Auto Bid will automatically bid per increment up to your maximum amount submitted against any other bids received. Should there be no additional bids, it will **automatically stop at the highest amount required to secure the item for you.**

AUTO EXTEND:

If there is **bid activity in the last 5 minutes of the auction, the clock will automatically extend by an additional 10 minutes** for that asset until all bid activity stops - **subject to a maximum extension of 90 minutes**. This ensures fair bidding and accommodate newer or slower bidders or those with weaker bandwidth.
